

# Patrick Tang

**Pat Tang** grew up in a Chinese Hong Kong family, was educated in the UK and is now working in the US. His career is equally diverse, starting work in a Physics Lab and is now a Technology VP at Amazon Lab126 where he has led teams to: develop cloud-based simulation to aid the design of thin, lightweight, products; reliability testing and materials characterization. He has also built a software team for product data intelligence and is now researching into Machine Learning, AI for test automation and analysis. Product Integrity now has labs in China, Sunnyvale and Seattle as it endeavors to ensure product integrity for Amazon products as well as our Lab126 products.

Pat is also active in the Project Mustard Seed Charity work to develop typhoon resistant buildings and future leaders to rise above poverty. He is also passionate about developing Asian Leaders within Amazon, serves as Executive Sponsor for Asians@Amazon, and has started Project Red Packet for Amazonians to bring their best ideas to improve our business in the China.
