

Literature Reviews

Creating A Research Space

**Troy Mikanovich | Graduate Writing Coach
Annenberg School for Communication**

Today's workshop

- Goals of a literature review
 - + Descriptive moves
 - + Analytical moves
- Contextualizing your work
- Creating a Research Space (CARS)
 - + Evaluating literature
 - + Taking a stance on the literature
- Organizing a literature review
 - + Organizing sources
 - + BEAM sources

Goals of a literature review

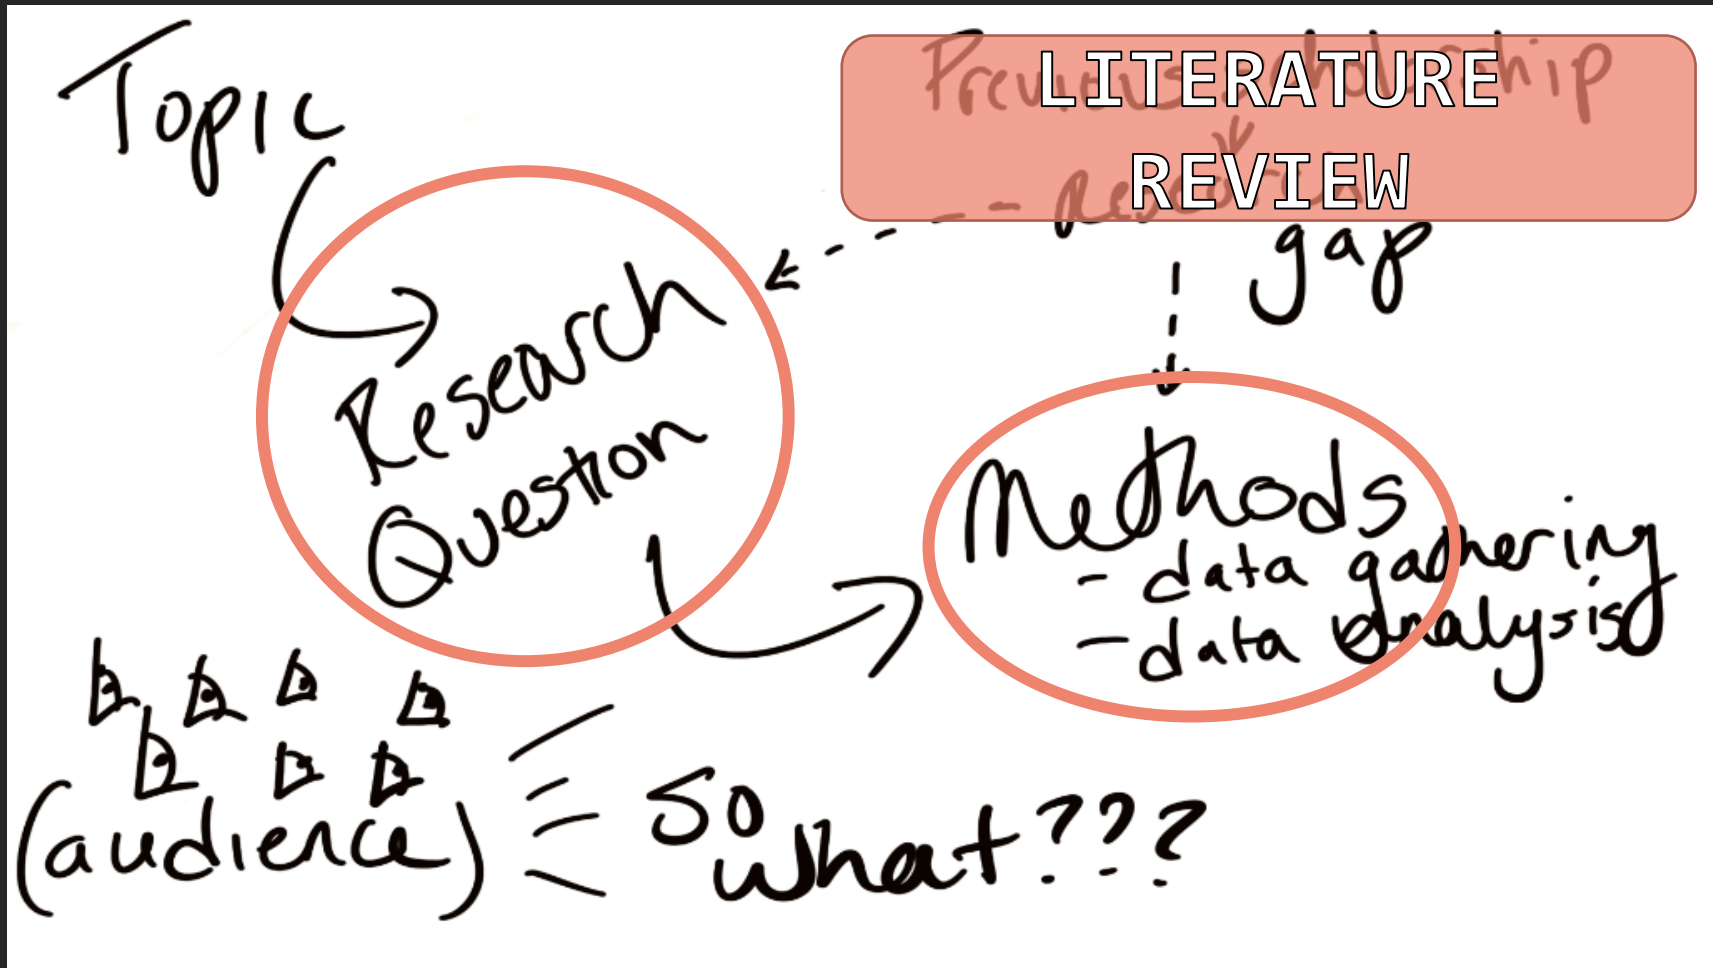

Goals of a literature review

Goals of a literature review

Goals of a literature review

Contextualizing your work

- What is the context of your work?
 - + Social Context (What real world situation/phenomenon does this work help us understand?)
 - + Academic Context (What has prior scholarship said about this question or related issues?)

Contextualizing your work—lit review

- What is the context of your work?
 - + ~~Social Context (What real world situation/phenomenon does this work help us understand?)~~
 - + Academic Context (What has prior scholarship said about this question or related issues?)

Contextualizing your work—lit review

- What is the context of your work?
 - + ~~Social Context (What real world situation/phenomenon does this work help us understand?)~~
 - + Academic Context (What has prior scholarship said about this question or related issues?)
 - What is the research gap that you will fill with your scholarship?
 - What is the problem with this gap not being filled?

CARS

Literature review

Creating a Research Space (CARS)

Swales, John M. and Christine B. Feak. 2004 *Academic Writing for Graduate Students*. 2nd ed. Ann Arbor: University of Michigan Press.

Research gap (academic problem)

CARS

Literature review

Creating a Research Space (CARS)

Swales, John M. and Christine B. Feak. 2004 *Academic Writing for Graduate Students*. 2nd ed. Ann Arbor: University of Michigan Press.

- Move 1: Establish Territory
 - Demonstrate the importance of the topic
 - Introduce and review items of previous research in the area of study (**survey the field: DESCRIPTIVE**)
- Move 2: Indicate a gap in the previous research, establish that previous knowledge needs to develop in some way, or evaluate the state of the field (**take a stance: ANALYTICAL**)

Research gap (academic problem)

CARS

Introduce and review items of previous research in the area of study

Indicate a gap in the previous research, establish that previous knowledge needs to develop in some way, or evaluate the state of the field

CATS

Introduce and review items of previous research in the area of study

Indicate a gap in the previous research, establish that previous knowledge needs to develop in some way, or evaluate the state of the field

Identify how your own project will address this research gap; how your work will contribute to the conversation you have described

CARS

Introduce and review items of previous research in the area of study

Survey the literature

Indicate a gap in the previous research, establish that previous knowledge needs to develop in some way, or evaluate the state of the field

Evaluate/analyze the literature

Identify how your own project will address this research gap; how your work will contribute to the conversation you have described

Contribute to the literature

CARS

Introduce and review items of previous research in the area of study

Survey the literature

LITERATURE REVIEW

Identify a gap in the previous research, establish that previous knowledge needs to develop in some way, or evaluate the state of the field

Evaluate/analyze the literature

METHODOLOGY

Identify how your own project will address the research gap. How your work will contribute to the conversation you have described

Contribute to the literature

Constructing a gap: “We still don’t know...”

Although online dating is gaining prominence as a strategy to find a romantic partner, academic research into the antecedents of Internet dating is still scarce. This survey study has two aims. The first is to investigate the demographic antecedents of online dating. The second is to investigate the validity of two opposing hypotheses that explain which

Valkenburg, Patti M., and Jochen Peter. 2007. “Who Visits Online Dating Sites? Exploring some Characteristics of Online Daters.” *CyberPsychology & Behavior* 10(6): 849-852.

Constructing a gap: “Something has changed”

2002). Mediated matchmaking is certainly not a new phenomenon: Newspaper personal advertisements have existed since the mid-19th century (Schaefer, 2003) and video dating was popular in the 1980s (Woll & Cosby, 1987; Woll & Young, 1989). Although scholars working in a variety of academic disciplines have studied these earlier forms of mediated matchmaking (e.g., Ahuvia & Adelman, 1992; Lynn & Bolig, 1985; Woll, 1986; Woll & Cosby, 1987), current Internet dating services are substantively different from these incarnations due to their larger user base and more sophisticated self-presentation options.

Ellison, Nicole, Rebecca Heino, and Jennifer Gibbs.
2006. “Managing impressions Online: Self-
Presentation Processes in the Online Dating
Environment.” *Journal of Computer-Mediated
Communication* 11: 415-441.

Constructing a gap: Flaws in prior scholarship

Comparison of meeting partners online versus offline has already been conducted in previous studies.^{4,8} Findings from these studies suggested that married couples who had met their partners online reported greater relationship satisfaction and relationship quality and lower divorce rates compared to couples who had met their partners offline. There are three issues that have been overlooked in these studies. First, the studies have primarily focused on marital relationships. However, not all online-initiated relationships result in marriages. As a matter of fact, only 49% of online daters

Paul, Aditi. 2014. "Is Online Better Than Offline for Meeting Partners? Depends: Are You Looking to Marry or to Date?" *Cyberpsychology, Behavior, and Social Networking* 17: 664-667.

Filling a Gap: Here's what I'll do about it...

2006). Although existing research reveals suspicions about lying in online dating profiles, it has been limited to self-report data that do not describe actual deception practices. The reliance on self-report methods is an important limitation for deception research in general, as it involves asking participants to be honest about lying (DePaulo, Kashy, Kirkendol, Wyer, & Epstein, 1996).

In the present study, we address this issue by comparing the information presented by daters in their online profiles with their observed characteristics in an effort to establish *ground truth* about the information in online dating profiles. Ground truth is defined as the actual

The Academic Phrasebank is a general resource for academic writers. It aims to provide you with examples of some of the phraseological 'nuts and bolts' of writing organised according to the main sections of a research paper or dissertation (see the top menu). Other phrases are listed under the more general communicative functions of academic writing (see the menu on the left). The resource should be particularly useful for writers who need to report their research work. The phrases, and the headings under which they are listed, can be used simply to assist you in thinking about the content and organisation of your own writing, or the phrases can be incorporated into your writing where this is appropriate. In most cases, a certain amount of creativity and adaptation will be necessary when a phrase is used. The items in the Academic Phrasebank are mostly content neutral and generic in nature; in using them, therefore, you are not stealing other people's ideas and this does not constitute plagiarism. BEAM: A Rhetorical Vocabulary for Teaching Research-Based Writing

This article argues that writing teachers can encourage students to adopt a rhetorical perspective toward research-based writing by characterizing products of research in terms of how writers use them in their texts. It maintains that the standard nomenclature for treating sources (primary, secondary, tertiary) is anti-rhetorical and proposes an alternative: Background for materials a writer relies on for general information or for factual evidence; Exhibit for materials a writer analyzes or interprets; Argument for materials whose claims a writer engages; and Method for materials from which a writer takes a governing concept or derives a manner of working.

Over the past several decades, composition scholars have put forth a number of valuable proposals for improving the teaching of research-based writing.¹ Some have focused on the social, institutional, and discursive contexts within which research and writing happen. Patricia Bizzell and Bruce Herzberg, for example, argue that research should be regarded not as a sterile exercise in recovering what is already known but as a socially embedded act of inquiry that aims to further the collective understanding of a particular discourse community. Doug Brent similarly holds that if students are to appreciate the "intricate rhetorical dance" strong research-based writing entails, they must be taught to view reading as an active exercise in "knowledge construction" (105). Others have focused on the research paper as a genre, either dismissing it outright or proposing various alternatives. Richard L. Larson condemns it as a "Non-Form of Writing." Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams, among others, champion the research argument; Ken Macrorie gives us the

Bizup, Joseph. 2008. "BEAM: A Rhetorical Vocabulary for Teaching Research-Based Writing." *Rhetoric Review* 27(1): 72-86.

Functional Model

- Emphasizes what you do with a source over what a source "is"
- Allows for greater/explicit acknowledgment of the various ways that you could use a single source
 - e.g. I might be interested in a source for its methodological contributions while you might care more about the background information it provides.

- + Information taken for granted

Following the collapse of the Soviet Union, Russia began to develop some features of a nascent democratic media system under the rule of former President Boris Yeltsin before Vladimir Putin came to power in March 2000 (Becker, 2004; Oates, 2007). Putin’s policies suggested that the media should support his efforts to bring order back to Russia and to stand for Russian interests (Becker, 2004). One of his first moves was taking ownership of media outlets away from the oligarchs and bringing their channels under state control (Ioffe, 2010). From 1999 to 2011, Putin’s

Other ways of considering your sources

- Exhibit Sources

- + “materials a writer offers for explication, analysis, or interpretation... [A writer] must do rhetorical work to establish their exhibit’s meanings and significance” (Bizup 2008)

overlook its Russian origins. Second, this conflict marked the first time that RT produced disinformation. One of our participants described the coverage around Georgia as:

[t]he one that showed its [RT] true colors to the world when it spread complete lies about genocide, and this is when it was clear to everyone watching that it is a propaganda vehicle.

(Participant1, 2018)

Other ways of considering your sources

era. In a similar vein to Oates’s model, [Becker \(2004\)](#) argues that the current Russian media system is “neo-authoritarian,” in which media outlets have limited autonomy and where private ownership is, to some extent, tolerated.

[Tolz and Teper \(2018\)](#), by contrast, believe that labeling the current system in Russia “neo-authoritarian” or “neo-Soviet” does not adequately capture the major changes in the strategy Putin applied to media during his third presidential term. They suggest calling this system

Journal of Communication

To understand the inner workings of news organizations, researchers make use of a combination of newsroom ethnography and in-depth interviews (e.g., [Aşık, 2019](#); [Boczkowski, 2005](#); [Hassan & Elmasry, 2019](#); [Maziad, 2018](#); [Usher, 2013](#)). However, methodological challenges in accessing newsrooms are common in societies under authoritarian rule ([Figenschou, 2010](#)). Also, conducting newsroom ethnography in closed regimes might bring some unwanted risks to the researchers and might identify the study participants. In similar cases, interviews are the main method researchers rely on to examine the newsroom practices (e.g., [Umejei, 2018](#); [Wright, Scott, & Bunce, 2020](#)). In this study, we interviewed

Edit

Here are some worksheets/resources that you can use for different writing tasks that you may or may not already be familiar with. Think of them kind of like scaffolding exercises or steps on the way to a final product. If your professor already has some steps baked into the course--great! These can be useful addenda. However, if your professor isn't requiring things like intermediate drafts, outlines, annotated bibliographies, or proposals, then these can give you a bit of structure. Feel free to bring any of these materials (barely looked at or completed) to a one-on-one session with me, I'd be happy to help you out.
