Senior Engineer, Information Security
Job Description

JOB INFORMATION

Job Code:	166110
Job Title:	Senior Engineer, Information Security
FLSA Status:	Exempt
Supervisory:	
Job Family:	IT Security
Job Family Group:	Information Technology
Management Level:	7 Individual Contributor

JOB SUMMARY

Deploys, operates, and maintains security engineering solutions (e.g., endpoint, email, cloud security tools) across the university, ensuring they meet policies and standards. Works closely with security architecture, governance and risk management, and other central/local IT departments. Responsible for deploying technology protecting systems from security threats, data exfiltration, and other risks.

JOB QUALIFICATIONS:

Education

Req	Pref	Degree	Field of Study	
X		Bachelor's degree		
	X	Bachelor's degree	Information Science	Or
	X	Bachelor's degree	Computer Science	

Additional Education

Check here if experience may substitute for some of the above education.

X	Combined experience/education as substitute for minimum education

Work Experience

Req	Pref	Work Experience	Experience Level	
X		4 years	with security engineering technologies and solutions (e.g., EDR/XDR, Cloud security tools, file integrity monitoring, information security configuration, data security platforms, CASB, DLP, IDS/IPS, firewalls).	
	X	6 years		

Additional Work Experience

Check here if education may substitute for some of the above work experience.

X	Combined experience/education as substitute for minimum work experience

Knowledge, Skills and Abilities

Req	Pref	Functional Skills
X		Excellent understanding of information security engineering process from acquisition, design, build, and operation.

Knowledge, Skills and Abilities

Req	Pref	Functional Skills
X		Excellent understanding of security controls frameworks (e.g., CIS Top20, NIST CSF, 800- 53).
X		Experience defining and deploying security hardening guidelines.
X		Excellent understanding of the technology stack from OS, system, network and applications.
X		Proven understanding of CIS benchmarks and customer service metrics.
X		Experience managing different operating systems and configuration standards.
X		Ability to plan, organize and document complex system design activities.
X		Excellent written and oral communication skills, able to interact with a broad spectrum of people on a technical and professional level to share complex information.
X		Proven analytical, consulting and problem-solving skills, with exceptional attention to detail.
X		Excellent organizational skills and proven ability to manage multiple projects and priorities simultaneously.
X		Ability to teach/train others.
X		Experience with database administration, access management and systems/data backup, storage and recovery.
	X	Extensive experience in information security operations at large research universities.

Certifications

Req	Pref	Select Certifications	Enter Additional Certifications
	X		Certified Information Systems Security Professional (CISSP)
	X		Red Hat Certified Systems Administrator (RHCSA)
	X		Linux Foundation Certified Systems Administrator (LFCSA)

Other Job Factors

JOB ACCOUNTABILITIES

	% Time	Essential	Marginal	N/A
Gathers requirements supporting security engineering projects and engages in those that actively evaluate existing solutions, looking for areas of improvement. Contributes to the design and deployment of security solutions, ensuring efficacy in threat protection for university endpoints and data assets. Maintains security operations' infrastructure to support day-to-day work, ensuring performance impact is monitored and that tools are always available with applicable patches and updates.				
Creates configuration baselines to provide guidance on how systems are managed and hardened against security threats and vulnerabilities. Builds security test plans to ensure successful implemenation of new/existing solutions. Serves as the technical point of contact to schools/units to implement baselines across different operating systems. Supports the security engineering lifecycle to design, build, deploy, and manage enterprise infrastructure and solutions to enable compliance with university policies and standards.				
Manages and deploys endpoint security, data loss prevention, and analytical technologies on systems. Provides input on the development of information security policies and standards. Provides technical recommendations in security device selection, configuration and maintenance (e.g., network access control, data loss prevention). Works with internal/external stakeholders to ensure that enterprise security infrastructure is effective in deterring, detecting, and containing security threats and incidents. Provides support at customer meetings, gathering requirements for enhancing security solution designs.				
Ensures procedures and service level agreements are defined, tracked and met. Provides input on the reporting and metrics captured by governance and risk management. Creates reports on system security status and potential/actual violations with procedural recommendations provided. Contributes to the implementation of daily, weekly and monthly metrics for statistical threats and key performance indicators.				
Stays current with proven/emerging technologies that could strengthen security posture, as well as with any changes in legal, regulatory, and technology environments which may affect operations. Develops and maintains				

JOB ACCOUNTABILITIES

	% Time	Essential	Marginal	N/A
internal/external partnerships with relevant stakeholders to drive effective incident resolutions and the deployment of new security solutions. Ensures senior management and staff are informed of any changes and updates in a timely manner.				
Influences departmental goals and objectives (e.g., workforce planning, compensation). Promotes an environment that fosters inclusive relationships and creates unbiased opportunities for contributions through ideas, words, and actions that uphold principles of the USC Code of Ethics. Establishes and maintains appropriate network of professional contacts and memberships in professional organizations. Attends meetings, seminars and conferences, and maintains required/desirable certifications, if applicable.				

Other Requirements

Essential:	Emergency Response/Recovery	Essential:	Mandated Reporter
	In the event of an emergency, the employee holding this position is required to "report to duty" in accordance with the university's Emergency Operations Plan and/or the employee's department's emergency response and/or recovery plans. Familiarity with those plans and regular training to implement those plans is required. During or immediately following an emergency, the employee will be notified to assist in the emergency response efforts, and mobilize other staff members if needed.		A mandated reporter who in his or her professional capacity has knowledge of, or reasonably suspects a person who is under the age of 18 years, elderly, or a dependent adult has been the victim of abuse or neglect must report the suspected incident. The reporter must contact a designated agency immediately or as soon as practically possible by telephone or in writing within 36 hours. By virtue of the associated job duties, this position qualifies as a mandated reporter as required by state law and USC's policy at: https://policy.usc.edu/mandated-reporters/

Campus Security Authority (CSA)		Essential:
By virtue of the associated job duties, this position qualifies as a Campus Security Authority as required by law and USC's policy at: https://dps.usc.edu/alerts/clery/		

ACKNOWLEDGMENTS

The above statements reflect the essential and non-essential functions as necessary to describe the principle contents of the job. They are not intended to be a complete statement of all work requirements or duties that may be required of the position. I understand that I may be asked to perform other duties as assigned. USC reserves the right to add or change duties at any time.

The University of Southern California is an Equal Opportunity Employer. USC prohibits discrimination on any basis protected under federal, state, or local law, regulation, or ordinance or university policies. All employment decisions are based on individual qualifications and business need.

I acknowledge receipt of this job description and its associated physical requirements. I have read and understand the job description and job requirements and agree to abide by their contents. I realize that duties may be requested of me that are not specifically stated herein. I understand that I will be expected to adjust to potential fluctuations in work volume. I understand that, if I have any questions about the essential functions or expectations of my position, my supervisor and/or HR partner are available to discuss them with me.
